DETAILED ACTION

This office action is a response to the preliminary amendment filed on 9/29/2005.

1. This application is in condition for allowance except for the following formal matters:

IN THE DRAWINGS

The references in Fig. 5 are not written in English. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.

Figures 11 and 12 should be designated by a legend such as --Prior Art--because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.

IN THE SPECIFICATION

Re. <Brief Description of Drawings>: The description for Fig. 4 should be included Fig. 4 (a) and Fig. 4(b) and the description for Fig. 8 should be also included Fig. 8 (a) and Fig. 8 (b).

IN THE CLAIM

Re. Claims 3-8: Before the phrase "apparatus" as recited inline 1, the phrase "An" should be changed to —The--.

Art Unit: 3729

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

- 2. Claims 1-8 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as forming a column part and a fin part by molding a mother material, wherein the fin part is projected in the form of flat plate from an outer peripheral surface of the column part to an outer side in a radial direction of the column part and helically continuing in an axis direction of the column part at predetermined intervals along the outer peripheral surface of column part and punching out the column part for retaining the fin part by removing the column part to product helically formed by the fin part and coating the helical fin part with an insulating film and pressurizing both sides of the insulated helical fin part such that flat plate portions of the insulated helical fin part are superposed on one another. The closest reference of Toshio et al. (JP 52103602A) teach a process of making a coil by winding as shown in Figs. 3 and 4, forming as shown in Figs. 1 and 2 and cutting as shown in Figs. 9 and 11. Therefore, it would not be obvious to modify Toshio et al. by adding any mechanism to form a column part and a fin part including processes of molding,

Art Unit: 3729

punching, coating and pressurizing, since doing so would destroy the structure of coil of Toshio et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D. Kim whose telephone number is 571-272-4565. The examiner can normally be reached on Monday-Thursday between 6:00 AM to 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
